

## **SOFTWARE ENGINEER**

### **Company Background:**

I/Gear enables manufacturing excellence with products that facilitate seamless connectivity of technologies, superior product quality, greater productivity, and precise, real-time plant intelligence.

I/Gear has been a leader in providing solutions to the manufacturing industry since 1986, and has its roots in the systems integration business. In 2000, while working as a focused division of integrator, APS, a highly skilled team of MES (manufacturing execution system) experts and software developers began building a portfolio of branded I/Gear products.

Among others, we currently serve the automotive, food, material handling, pulp and paper, wastewater treatment, and metals industries. Our list of customers is a testament to I/Gear's success and effectiveness in the field. Visit [IGearOnline.com](http://IGearOnline.com) for more information.

### **Position Overview:**

This position requires experience with developing production quality software for the windows environment. As a member of a focused development team, this position will be involved with all of the aspects of the software development methodology. This position will be based out of the Louisville corporate office.

### **Responsibilities:**

- Analyze requirements, design, develop and deploy software solutions.
- Work with product support group as needed.
- Work with product training group as needed.
- Provide input to development schedules.

### **Requirements:**

- Bachelor's degree in engineering.
- 1 to 5 years of experience in software development using Microsoft tools.
- Solid understanding of relational database design and development.
- Experience with Microsoft SQL Server development.
- Experience with Microsoft Visual Basic/C# .Net development.
- Experience with Microsoft ASP .Net development.
- Excellent oral and written communication skills.
- Motivated and a self-starter.
- (Optional) Experience with the manufacturing environment.
- (Optional) Experience with plant floor control systems and devices.
- (Optional) Experience with Oracle development.
- (Optional) Experience with Installshield development.
- (Optional) Experience with Microsoft Visual Basic 6 development.

### **Salary/Benefits:**

I/Gear offers a competitive salary, casual work environment, and excellent benefits including medical, dental, 401k, paid vacation, and holidays. Salary for this position is commensurate with experience.
